

## **DEFENCE CAPABILITY ASSESSMENT AND CREATION OF WA DIRECTORY OF DEFENCE INDUSTRIAL CAPABILITIES**

Defence West, the State Government office responsible for growth and promotion of the defence sector, have engaged TCF Services to undertake a defence capability assessment and create an inaugural WA Directory of Defence Industrial Capabilities.

The industrial capabilities listed in the Directory will relate to the programs in the six Defence Capability Streams of the Commonwealth Government's 2016 Defence Integrated Investment Plan, which details \$195 Billion of investment to enhance the nation's defence capability.

If you are working in defence, aspiring to enter the defence supply chain, or have an innovative product or service we encourage you to review the materials at the online portal and **register your interest**:

[www.defencewesthub.com.au](http://www.defencewesthub.com.au)

Information received will be independently verified to generate an initial list of up to 100 firms whose capabilities respond most closely to the Defence Integrated Investment Program.

Responses from up to 150 additional firms will be canvassed for inclusion in an update of the inaugural printed directory, which collectively may be consolidated into an electronic portal at a later date.

The Directory will be used by Defence West and the WA Defence Advocate Rear Admiral (Rtd) Raydon Gates AO CSM to promote WA defence industry capability to the Commonwealth Government, defence prime contractors and to international markets.
